Summary

Motivated and detail-oriented IT Application Development graduate student with a strong foundation in full-stack development, problem-solving, and technical support. Skilled in Python, JavaScript, and web development frameworks such as Flask and React.js. Experienced in troubleshooting, API integration, and agile software development. Passionate about leveraging technology to enhance user experience and improve system efficiency. I am currently pursuing a master's in information technology at Arizona State University, eager to apply analytical and development skills to real-world healthcare technology projects in a collaborative environment

Skills

- **Programming Languages**: Python, JavaScript, HTML, CSS
- **Frameworks**: Django, Flask, Bootstrap
- **Web Development**: Responsive Design, Frontend Development, RESTful APIs
- **Databases**: MySQL
- **Tools & Technologies**: Git, Agile Development, Data Preprocessing
- **Machine Learning**: Deep Learning, Residual Neural Networks, Data Augmentation

Intern

Indra Institute of Education | Coimbatore, India
Web Application Developer Intern
01/2024 - 05/2024

- Developed and maintained a student and staff enrollment web application using Python, HTML, CSS, and JavaScript.
- Implemented features for staff to enroll students, assign courses, and record daily attendance, improving operational efficiency by 30%.
- Designed a user-friendly interface for seamless data entry and course management, enhancing staff productivity.
- Collaborated in an agile team, contributing to sprint planning and code reviews to ensure high-quality deliverables.

Professional Summary

- Proactive and results-driven Web Application Developer with experience in agile software development.
- Proficient in Python, JavaScript, Django, Flask, and database management for full-stack development.
- Skilled in designing responsive and user-friendly interfaces using HTML, CSS, and JavaScript.
- Demonstrated excellence in deep learning research, achieving over 90% classification accuracy using Residual Neural Networks for satellite image analysis.

Projects

Residual Neural Network-Based Satellite Image Classification Using Deep Learning, 01/01/23

- Designed and implemented a ResNet model with skip connections for environmental monitoring.
- Conducted dataset preprocessing, GPU-accelerated training, and data augmentation.
- Achieved >90% classification accuracy, enhancing reliability in land use analysis.

E-Commerce Web Application, 10/01/23 - 11/01/23

- Developed a responsive e-commerce platform using Python, HTML, CSS, and JavaScript.
- Designed user-friendly interfaces, enabling seamless online shopping and transactions.

Certificates

- Best Paper Certificate, Institute for Engineering Research and Publications, 2023, awarded for contributions to Residual Neural Network-Based Satellite Image Classification – (View Certificate)
- Certified in Python Full Stack Development, IIE (Indra Institute of Education) – (View Certificate)

Education

Arizona State University | Tempe
Master of Science in Information Technology
Expected in 04/2026

SRM Institute of Science & Technology | Chennai, India
Bachelor of Engineering in Computer Science & Engineering
01/2023
GPA: 8.89/10.0
